### DETAILED ACTION

1. The preliminary amendment filed July 15, 2004 has been received.

#### *Drawings*

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the electric motor driving the throttle valve shafts at a position between the first and second throttle valves must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Specification***

3. The disclosure is objected to because of the following informalities: see below.

Appropriate correction is required.

In the next to the last line of paragraph [0026] "must 46" should be –mast 46-.

In paragraph [0037], line 2 "143" should be corrected to –130-.

In paragraph [0060], line 3 from the bottom "the intake" is repeated.

In paragraph [0092] reference numeral 420 is used to point out both "he lever" (line 12) and the "signal line" (last two lines).

***Claim Objections***

4. Claims 22, 23, 25, and 26 are objected to because of the following informalities: see below. Appropriate correction is required.

In claim 22 "Riders" should be –rider's- and "hall" should be –hull-.

In claim 23 "to, and a first mode, to open" should be –to, in a first mode, open-.

In claim 25 "at position" should be –at a position-

In claim 26 "the throttle valve shafts" has no clear antecedent.

***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claim 25 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one

Art Unit: 3617

skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification as originally filed fails to provide support for the electric motor driving the throttle valve shafts at a position between the first and second throttle valves.

***Allowable Subject Matter***

7. Claims 19-24 and 26-29 are allowed.

***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Arnold et al is cited to show the throttle control 17 for a marine engine. Katayose is cited to show the motor 28 for the throttle valve. Torigai et al is cited to show electric motor 53 which controls the throttle valve of an outboard motor. Imoehl is cited to show the electronic throttle actuator. Japan 2001-98960 is cited to show filter 24 within the intake chamber. Japan 2001-295711 is cited to show the intake chamber 18.
